# Just Agri

An Integrated Solution for Managing the Farm, Feedlot, and Meat Processing Business Processes. Our Suite of Offerings Are Built on The Microsoft Dynamics Business Central Platform, Leveraging the Power of Data Management to Produce Accurate, Timely, and Meaningful Reports to Improve Business Profitability.

# Key Features

## Farm Management

- Dual quantities of measure e.g. Animal units vs Animal Weight
- Transformations - Feed blending
- Animal purchasing
- Medical programs
- Animal processing including traceability
- Animal marketing

## Feedlot Management

- Animal purchasing including predetermined pricing parameters
- Animal medical programs including traceability of medicine used
- Animal serialisation including a profit and loss per animal
- Animal processing for optimal feedlot utilisation and growth performance
- Animal marketing

## Meat processing

- Dual quantities of measure e.g. Sales in Unit and Invoicing in weight
- Transformations – Live animals to carcass/sides, offal sets, heads and hides
- Slaughter batches ensuring slaughter lines and staff are utilised more efficiently
- Price matrix to ensure correct prices are being charged to customers
- Shipment planning

## A Single Integrated Solution To Control Operational Processes From The Farm To A Customer Ready Retail Product.
